<213> Artificial Sequence

<220>

<223> base sequence of a part of reverse DNA  
primer which is used in PCR and the base  
25 sequence of a part of reverse DNA primer  
hybridizes with DNA fragment originated from  
yeast gene.

Free text of a sequence table:

(1) Description of other related information relating to the sequence of sequence No. 1.

5       A forward primer for amplifying yeast gene (YGR281W)

(2) Description of other related information concerning the sequence of Sequence No. 2.

10       A sequence complementary to yeast gene (YGR281W) of a reverse primer for amplifying the yeast gene (YGR281W).
